PROFESSIONAL SUMMARY

Frontend Developer with 2.8+ years of professional experience building responsive, component-driven web applications and enterprise dashboards using React.js and Next.js. Proficient in JavaScript, TypeScript, REST API integration, and modern state management with Redux Toolkit, with a track record of converting Figma designs into pixel-accurate interfaces and optimizing frontend performance. Working knowledge of Node.js for backend API integration, with hands-on experience deploying applications on VPS environments (Hostinger, GoDaddy) and delivering both full-time and freelance frontend projects.

TECHNICAL SKILLS

Frontend Frameworks: React.js, Next.js, React Native

Programming & Core Technologies: JavaScript (ES6+), TypeScript, HTML5, CSS3

UI & Styling: Tailwind CSS, Material UI (MUI), Styled Components, Framer Motion, Responsive Web Design

State Management: Redux, Redux Toolkit, Context API, TanStack Query (React Query)

Backend & API Integration: Node.js, REST APIs, Java Spring Boot API Integration

Performance & SEO: Lazy Loading, Code Splitting, Memoization, Next.js Metadata, Image Optimization

Tools & Development Workflow: Git, GitHub, Figma, VS Code, Postman, Jira, Agile, Scrum

Deployment & Infrastructure: VPS Deployment, Hostinger, GoDaddy, Linux, Nginx

PROFESSIONAL EXPERIENCE

Frontend Developer | Avitam Technologies March 2023 – Present

Coimbatore, Tamil Nadu | Full-time

- Built 4+ scalable, component-driven web applications using React.js and Next.js, reducing code duplication by approximately 30% through reusable component architecture.
- Developed responsive, cross-browser UIs using Tailwind CSS and Material UI, achieving consistent experiences across 5+ device types and major browsers.
- Integrated 10+ REST APIs using Redux Toolkit for efficient state management, improving data-fetch reliability and reducing redundant re-renders by approximately 25%.
- Optimized frontend performance using lazy loading, code splitting, and memoization, reducing average page load time by approximately 35–40%.
- Converted Figma designs into pixel-accurate interfaces with less than 2% visual deviation, collaborating with designers and product managers in Agile sprints.
- Implemented cron-based scheduled test execution for an internal automation platform, saving approximately 5 hours per week of manual testing effort.
- Gained hands-on experience deploying web applications and backend services on VPS environments using Hostinger and GoDaddy.

SELECTED PROJECTS

Zero-In — Enterprise Automation Platform

March 2023 – August 2026

Frontend Developer | Enterprise internal automation platform (client/organization context: Cheil, Samsung) | Next.js, Tailwind CSS, Material UI, Java Spring Boot, REST APIs

- Built an internal admin panel to manage test runs, generate detailed test case results, and automate reporting, replacing manual tracking workflows.
- Developed real-time analytics dashboards visualizing test execution status and validation results.
- Integrated backend APIs for test execution, configuration management, and CRUD operations.
- Implemented OTP-based login with TOTP two-factor authentication using Google Authenticator, and designed Role-Based Access Control (RBAC) to enforce permissions and secure access to application modules.

Light Store — E-commerce Product Listing Platform

November 2025 – January 2026

Freelance / MERN Stack Developer | Next.js, Tailwind CSS, Material UI, Node.js

- Built category-wise product listings with dynamic loading and optimized UI, supporting 50+ product SKUs.
- Implemented product enquiry and contact workflows from product pages.
- Integrated a Node.js backend for dynamic data fetching and automated enquiry email notifications.

Pivedha — Education SaaS Platform

March 2026 – Present

Frontend Developer | React.js, Next.js, JavaScript, Dashboard UI, Admin Panel, REST APIs

- Developed student dashboard interfaces and test-page workflows for an education SaaS platform.
- Developed and enhanced admin-panel modules for platform management and operational workflows.
- Built reusable UI components, forms, and data-driven, API-integrated frontend functionality.

EDUCATION

Bachelor of Engineering — Mechatronics Engineering

SNS College of Technology, Coimbatore | 2019 – 2023 | CGPA: 8.6 / 10
